Dual Cleaning Modules for Your Needs

iClean robot comes with two interchangeable modules designed for flexible cleaning

600ml Dust Box

Best for Sweeping Only

Large capacity to collect dry debris, ideal for everyday dusting

2-in-1 Water Tank Module (550ml Water + Small Dust Box)

Perfect for Sweeping & Mopping Together

Simultaneously vacuums dust and mops the floor for complete cleaning in one go.

DUST + MOP BOX

DUST BOX

Why iCLEAN's Dynamic Round MOP Is a Game-Changer Not All MOPs Are Equal!

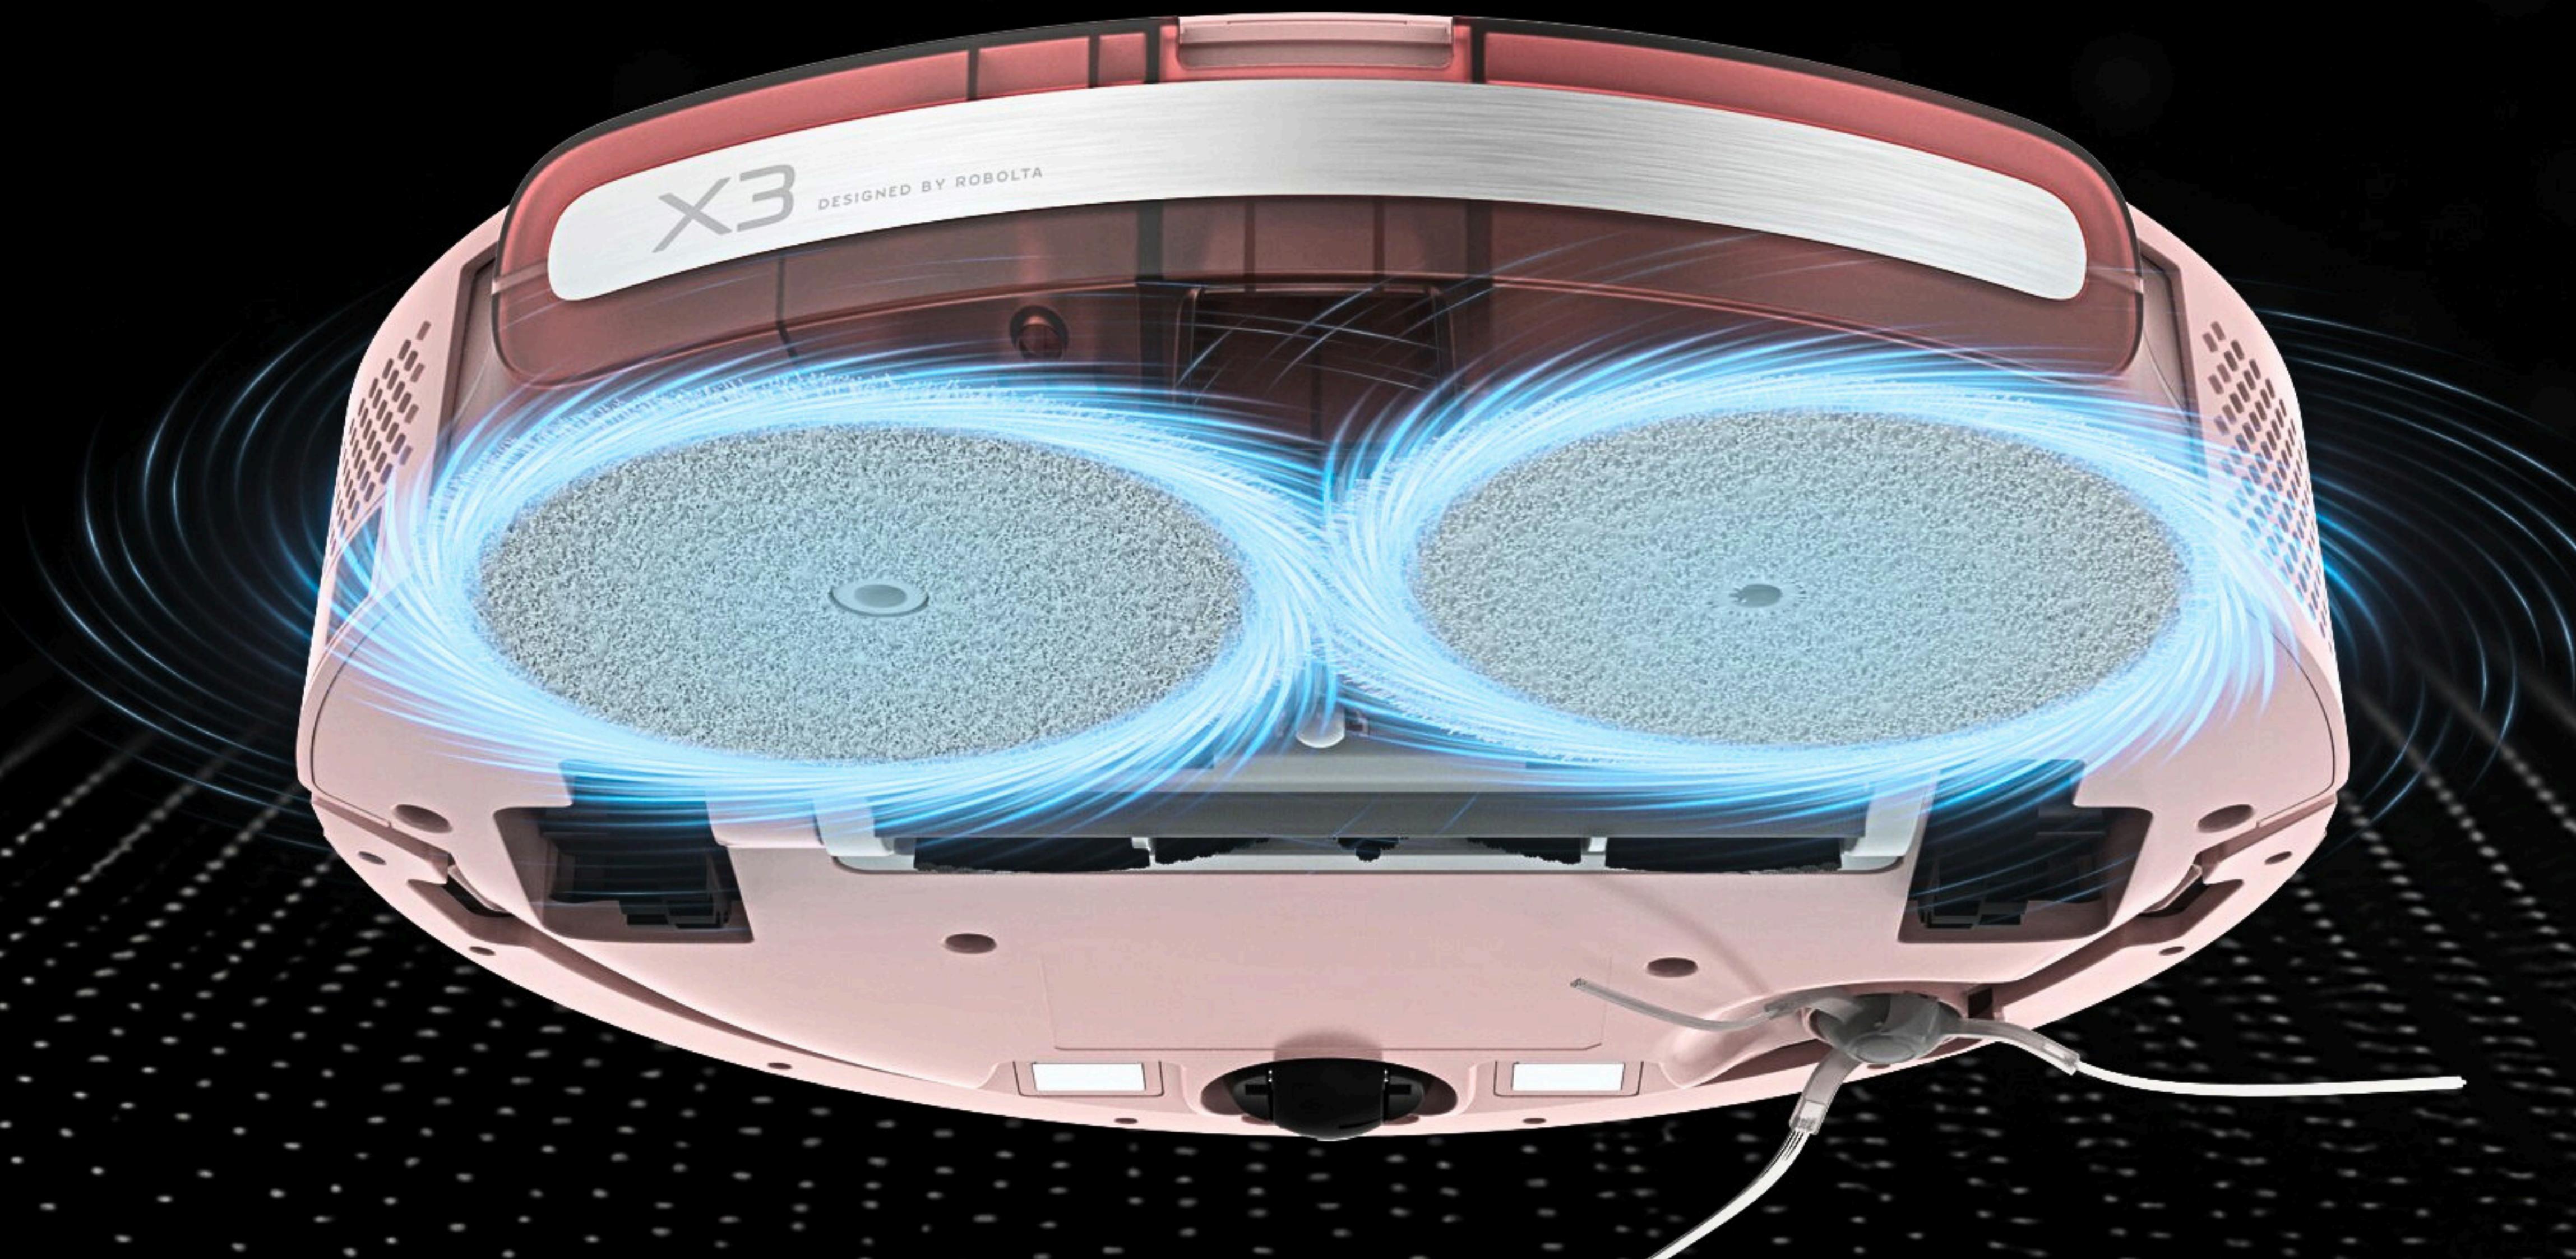

Unlike traditional robotic mops that use fixed or static cloth pads, iClean uses high-frequency, dynamic circular rotating mops giving you deeper, more efficient cleaning

iCLEAN's Dynamic Circular MOP

- ✓ Rotates 360° for active scrubbing
- ✓ High-frequency movement mimics hand mopping
- ✓ Targets stubborn stains with pressure-based cleaning
- ✓ Covers more floor area with less water usage
- ✓ Delivers better shine & hygiene

Traditional Fixed Mop (Other Brands)

- ✗ Static pad – just drags across floor
- ✗ Misses tough stains and sticky spots
- ✗ Less efficient in corners or textured surfaces
- ✗ More water wastage
- ✗ No active scrubbing – just wiping

Upgrade To iCLEAN

Experience the power of motion. Clean smarter, not harder!

Dual-Brush Technology- One Powerful 2-in-1 Brush

iClean robots feature a single integrated dual-brush system a perfect combination of bristles and rubber brush in one.

No Interchange Needed – One smart brush for all floor types

Deep Cleaning Performance – Efficiently removes:

Human and pet hair | Small dust particles
Fine dust | Dry waste | Food crumbs

Rubber-Wool Rolling Brush

Ideal for deep cleaning hardwood floors, lifting dust from crevices

Rubber Brush

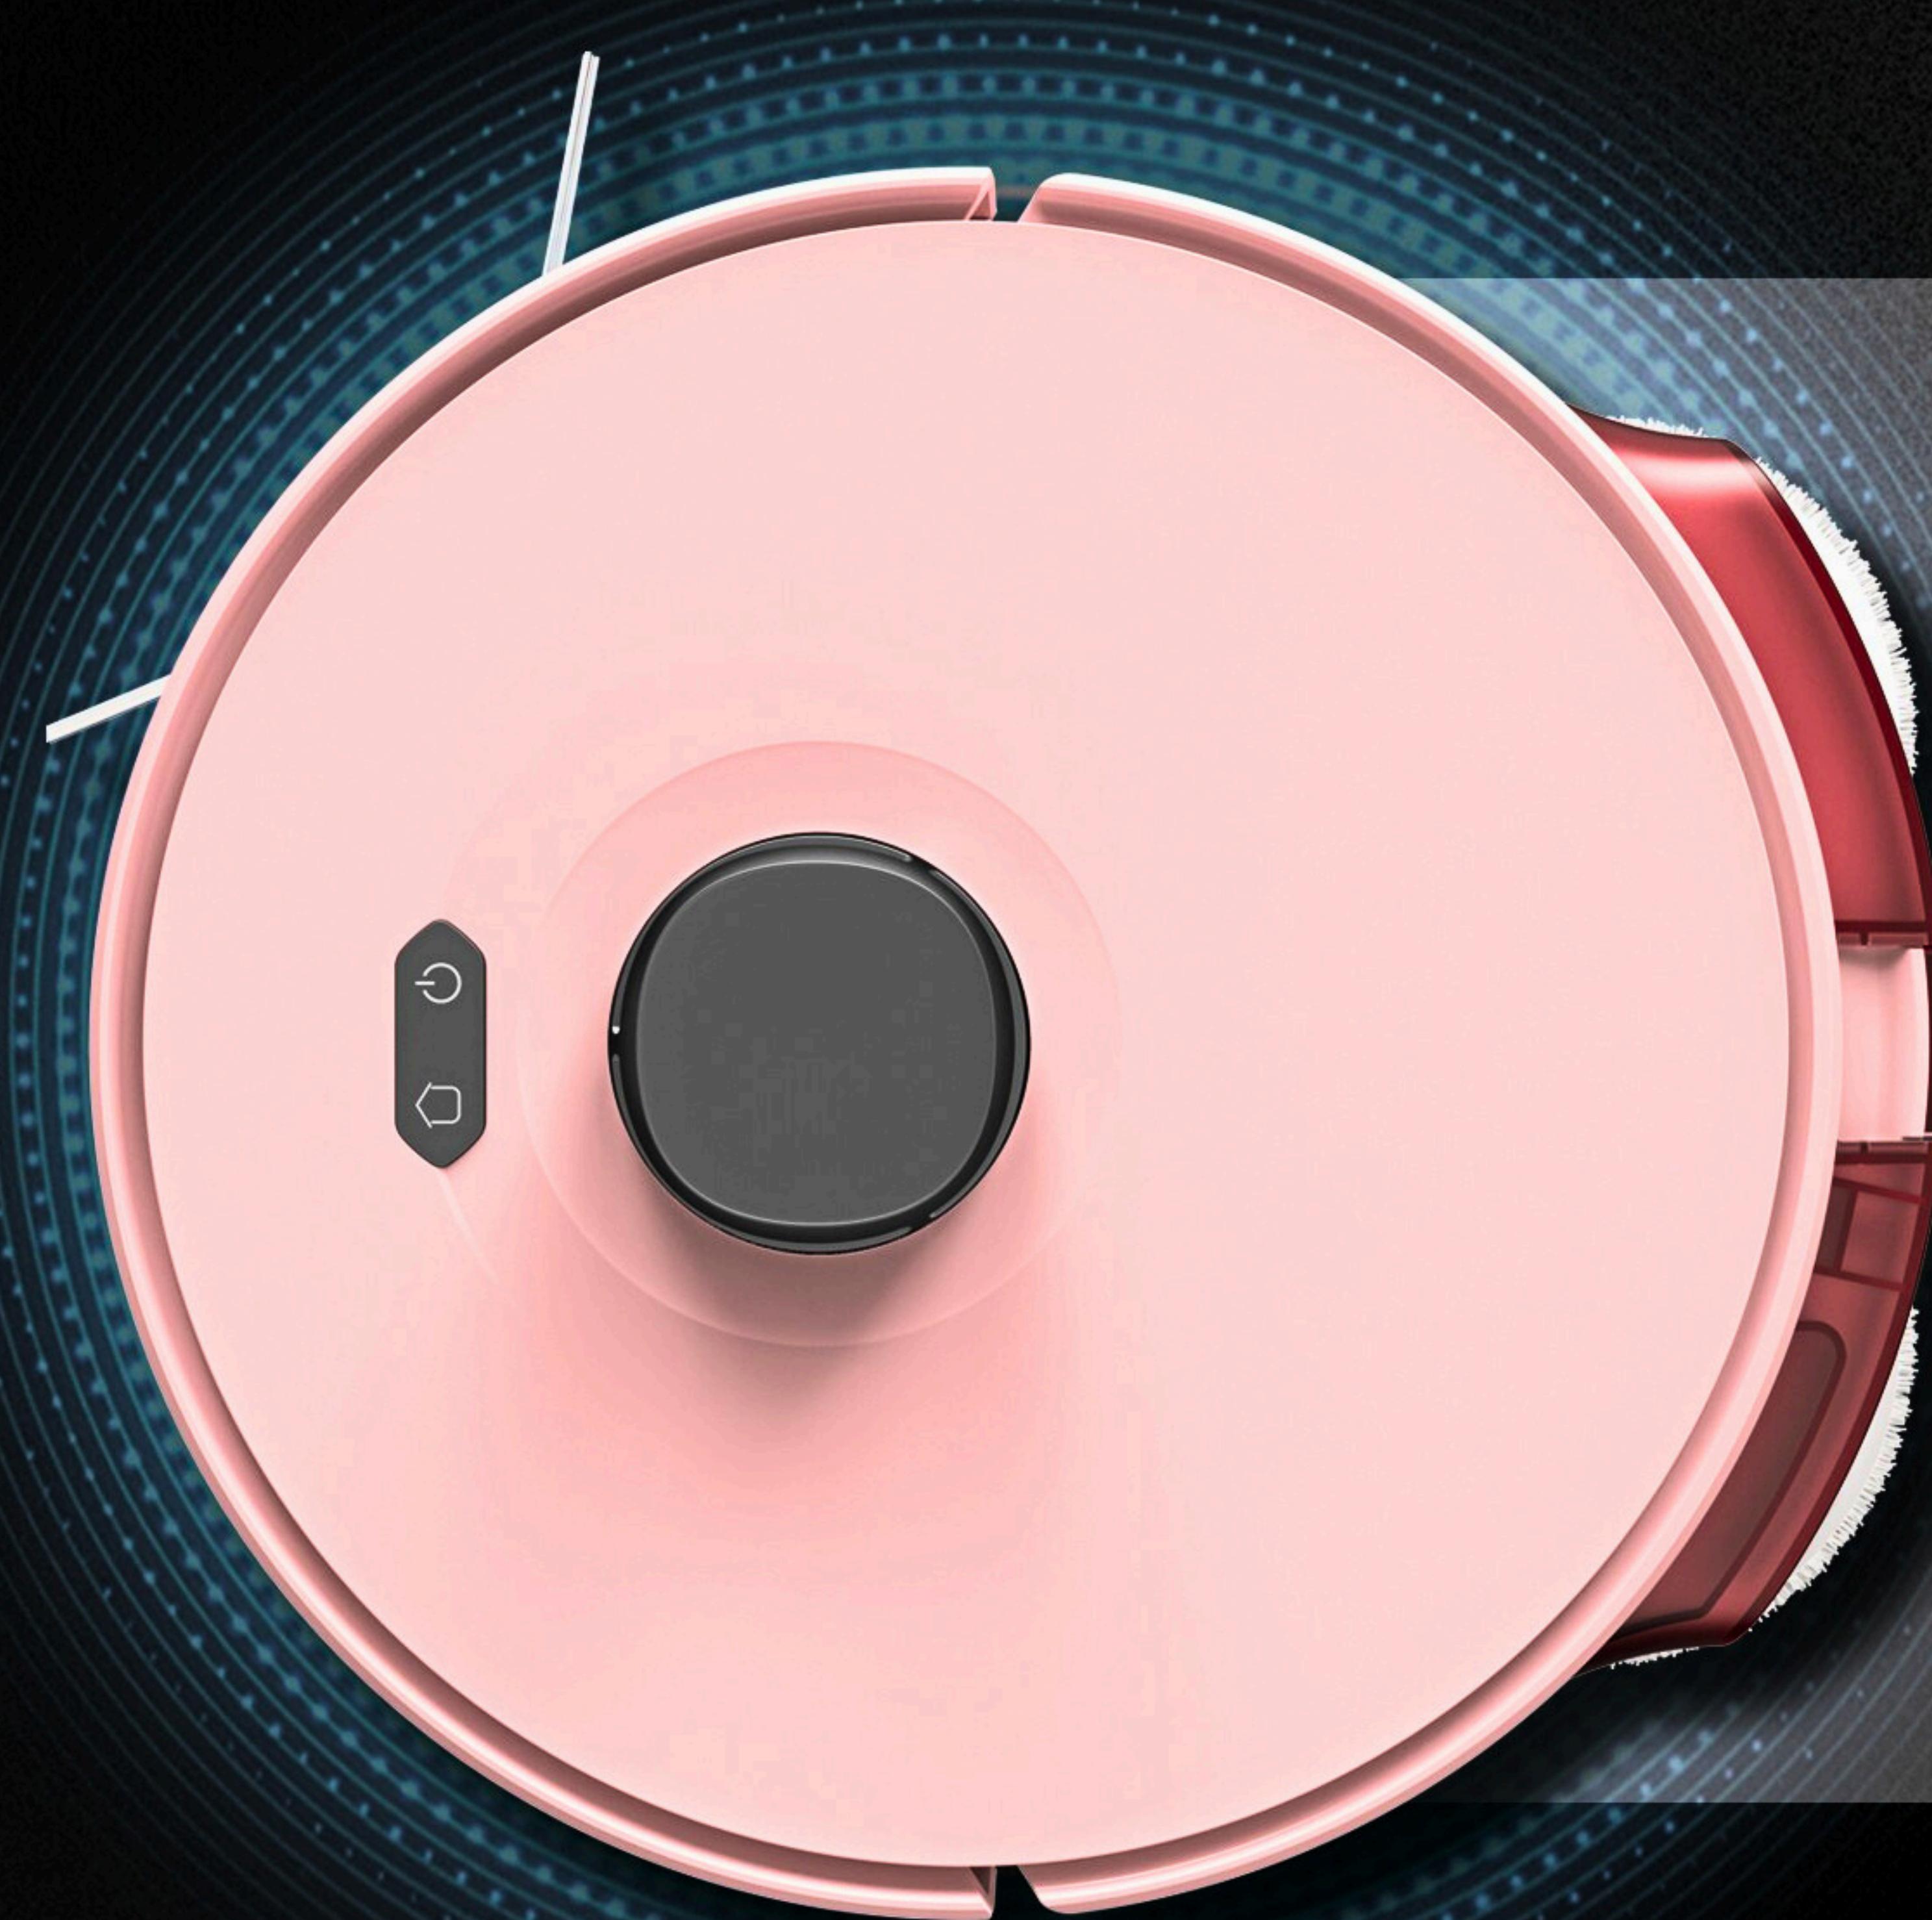

Perfect for carpets and pet owners, removing embedded dust while preventing hair tangling

Designed to handle everyday messes with ease from tiles to carpets.

Intelligent Environmental Awareness System

When unexpected objects like toys or obstacles appear,
RX3 automatically navigates around them
using advanced sensors

Ultra-Wide Vision

Detects objects up to
12m away

High-Frequency Response

Dynamic obstacle avoidance

Real-Time 3D Mapping

Instantly scans & adjusts
for obstacles

Precision Detection

Identifies & adapts to even
small objects

Perfect For

Busy Professionals

Say goodbye to daily cleaning stress
let Robota handle it while you focus on your career.

Pet Owners

Effortlessly picks up pet hair, dander, and crumbs to
keep your home fur-free and fresh.

Modern Households

Ideal for families that value hygiene, convenience,
and time-saving tech.

Multi-Floor Homeowners

Lightweight, portable, and efficient – easy to move between
floors without a charging station.
